How to connect and pay for WiFi

Step 1: Open Wireless Connections and choose Event_Wireless from list of available WiFi options. This will bring up a separate webpage to enter the below information to purchase WiFi.

Step 2: Swipe up to Login and Choose Create Login

Step 3: Choose your package—Single Day / Multiple Day and Speed Options (5mb / 10mb). If need WiFi for more than one device and would like to use same password for each, choose Optional Addons and Add Additional Devices. Touch and the white circle and scroll over to how many devices that will be using WiFi. This will then give your total cost.

NOTE: If you don't choose Optional Addons and if you have multiple devices needing WiFi and want separate passwords for each, you will need to repeat this entire process for each device.

Step 4: Enter account info (choose your login and password) and payment information, click to accept Terms and Conditions, then Purchase and you should be good to go.

Technology FAQ's

* What speed do you need to choose for Wi-Fi?

5 Mb - Recommended for light use and/or general web browsing

10 Mb - Recommended for HD streaming and/or advanced web browsing

* I am having issues with my Wi-Fi Connection, who do I call?
